A customer's phone journey

- No visible tap-to-call button on your mobile homepage. We did not open the menu.
- Your quote link sits about 6 screens down on a phone.
- Your quote form asks for 7 things and does not say what happens after someone sends it.

Your homepage took 3.9 to 5.1 seconds to load in 3 phone-screen tests from our server. Speeds on your own phone may differ.

3 practical fixes

1. **Make calling easier.** Add a clearly labeled call button at the top of your mobile homepage, with the correct number. Who: your web person.
2. **Bring the quote link forward.** Place the existing quote link near the top of the mobile homepage. Who: your web person.
3. **Explain what happens next.** Say who replies and what happens next beside the form. Who: you.
